> *I'm seeking a Lead or Senior Front-End Engineering position, but welcome the opportunity to grow into full-stack role.*

WORK EXPERIENCE

Medical Solutions - Remote
Senior Front-End Developer
3/2023 – 3/2024

- Led front-end development on client-facing ReactJS web application
- Collaborated closely with product, design, QA, and back-end teams to ensure project requirements are met and delivered on time
- Discovered and implemented efforts to improve code quality, structure, speed, and test coverage
- Helped direct, maintain, and grow custom component libraries
- Mentored junior developers

Gutcheck - Denver CO
Senior Front-End Developer
7/2019 – 1/2023

- Coordinated with product, back-end, and QA to ensure projects were delivered as designed and on time
- Created and maintained a suite of React/NextJS apps that automated and facilitated previously time-intensive internal tasks
- Developed and maintained a suite of Cypress and Jest end-to-end, integration and unit tests
- Created and maintained a set of Lambda functions that generate client deliverable documents containing charts, tables, and other assets
- Maintain GitHub Workflows and Atlas MongoDB aggregations

Ping Identity - Denver CO
Lead Front-End Developer
4/2014 – 6/2019

- Created and maintained a library of custom front-end React components used across multiple client-facing web applications
- Coordinated with designers to harden component designs and UI
- Managed feature development for a small team of library-focused developers
- Mentored junior developers

Yahoo! Inc / Associated Content - Denver CO
Front-End Developer
2/2010 – 3/2014

- Collaborated with designers and back-end engineers to prototype and code various front-end JavaScript-based web applications
- Coordinated with UI team to harden user workflows and interactions
- Build out front-end UIs using JavaScript and CSS
- Created and improved site design language and patterns
